

Lilit Poghosyan, Frontend Developer

+37455940914, lilitpoghosyan94@gmail.com

Summary

Dynamic and results-driven Frontend Developer with 5+ years of hands-on experience in building scalable, high-performance web applications. Specializing in creating maintainable, reusable codebases that prioritize efficiency and user-centric design. Proven expertise in delivering innovative, high-quality solutions that enhance user experience, optimize performance, and drive business growth. Passionate about tackling complex technical challenges, streamlining workflows, and continuously improving product quality through intuitive UI enhancements. Skilled at translating business objectives into technical solutions in close collaboration with cross-functional teams, ensuring alignment with user needs and organizational goals.

Work Experience

Jul 2024 - Present

Fullstack developer, Upwork

- Refactored a large-scale legacy project, improving maintainability, performance, and scalability,
- Architect scalable and maintainable frontend solutions,
- Optimize UI components for performance, scalability, and cross-browser compatibility,
- Collaborated with cross-functional teams, participated in Agile Scrum sprints, and used Jira for tracking and resolving project tasks,
- Implement responsive and adaptive design principles to ensure applications are mobile-friendly,
- Diagnose and resolve performance issues, including load times, rendering performance, and responsiveness.

Feb 2024 - Jun 2024

Senior Frontend Developer at Gaming Solutions LLC

- Developed project strategies, goals, and milestones in collaboration with leadership and clients,
- Analyzed project performance data and generated reports for stakeholders, implementing corrective actions when necessary,
- Ensure high standards of code quality by enforcing best practices and conducting code reviews, maintaining a consistent coding style across the codebase, and adhering to industry standards and internal guidelines
- Supervised junior team members, providing guidance and feedback.

Jul 2022 - Feb 2024

Mid Frontend Developer at CloudSideTech LLC

- Developed new modules from scratch, including features like reports, user settings, and surveys,
- Work closely with QA engineers to ensure high-quality software releases,
- Collaborate with DevOps engineers to ensure smooth deployment and operation of web applications,
- Ensure high standards of code quality by enforcing best practices and conducting code reviews,
- Maintain a consistent coding style across the codebase, adhering to industry standards and internal guidelines.

Nov 2021 - Jun 2022

Mid Frontend Developer at NextStack LLC

- Create an NFT application from scratch,
- Integrate Azure Auth for secure user authentication and data protection, and Azure Blob Storage for storing NFT images,
- Integrate Azure Login for secure user authentication and data protection.

Aug 2020 - Oct 2021

Frontend Developer at Aikoda LLC

- Migrate codebases, making it consistent in terms of structure, styling, and functionality,
- Implement lazy loading, improve bundle size, and reduce load times, achieving a 30% faster page load speed,
- Broke down monolithic code into reusable modules to improve maintainability and scalability,
- Develop new modules from scratch to enhance user functionality, including features like reports, user settings, and surveys.

Education

Management and Economics, Yerevan State University
Sep 2012 - Jan 2016

Skills

Javascript, ReactJS, Redux (Toolkit, Saga, Thunk), React Query, NextJS, Formik, Yup,
NodeJS, SQL, MYSQL
Angular2+, Typescript, NgRx, RxJS, Ngx-charts, Angular-SlickGrid
HTML5, CSS, SCSS, Sass, Bootstrap, Tailwind CSS, Styled Components, Material UI, Ant Design
Azure, Google Cloud, Docker, ESLint, Prettier, Web Vitals / Lighthouse,
Git, GitHub, GitLab, Bitbucket, Figma, WebSockets, Storybook
Familiar with C#, PHP, Python/Django

Languages

Armenian	Native Speaker	English	Good
Russian	Good
